

Geonado

HARMONIZATION
HOLOGRAM

PROTECTION FROM HIGH FREQUENCY RADIATION

Your quality of life

The Geonado Harmonization Hologram stores special information whose composition was determined and developed by experts. Measurements showed a reduction of the effects of the harmful rays in measured subjects.

Minimize the effects of electromagnetic fields

protection at its best

improved quality of life

The good feeling of doing the right thing

Invisible interference fields

It is undisputed that from mobile phones emit high-frequency electromagnetic fields in the frequency domain of over 2,000 megahertz (MHz). That this is a burden and damaging to the organism in the case of permanent and intensive use just like scientists have already proven several times. A high frequency radiation is unfortunately not felt, but the disruption on the organism can be very stressful (A court ruling in Italy, in 2017, recognised as an occupational disease the brain tumor by intensive use of mobile phone for the first time.)

Easy to use

Place the Geonado Harmonization Hologram on the battery of your device. If you do not have access to the battery, put it on the outside next to the charging port of your mobile device.

EFFECT

For daily use of smartphone, Tablet, Notebook, WLAN, Bluetooth Devices, baby monitors, etc.

In today's digital world, they are permanent companions of everyday life and are indispensable. Whether for professional reasons, for leisure or even for your night sleep. Independent studies have shown that these high-frequency electromagnetic stress lead to reactions in the body and can cause health issues.

This is how the Geonado hologram works

The Geonado Harmonization Hologram interacts with these fields and relieves the effect of the rays on the measured subjects. You can continue with the usual quality on your calls.

MEASUREMENT

Measurements show:

Darkfield blood analysis

The pictures clearly confirm that the GEONADO HOLOGRAM is capable of improving the quality of the blood after a tremendous electromagnetic load. Based on these results it can be expected that with a longer or continuous use of the GEONADO Holograms the clumping (Rolling) in the blood is not to be expected ... in 70% of the subjects a significant and positive change in the blood picture was detected with the GEONADO Hologram.

WITHOUT the hologram:
The blood cells are deformed and clumped and the blood picture is highly disordered

WITH the hologram:
No clumping, high oxygen level and a great structure. The Hologram reduced the effects of the electromagnetic load.

ECG double-blind study / measurement

(with approx. 100,000 individual measurements) These measurements and analyses with complementary medical methods as well as by ECG (heart rate variability) statistically showed a trend towards a clear reduction of stress reactions when using smartphones with the hologram compared to using smartphones without the hologram.

Your experience with the Geonado hologram

Andrea Geisler

HOUSEWIFE AND MOTHER

As a mother, the most important issue for me is to have the best possible protection when it comes to taking care of my family. All this permanent radiation nowadays really worries me. With the Geonado energy wave installed I think I can say that our house is already well secured. Also our phone calls are protected with the Harmonisation hologram from Geonado!

Kevin Wildauer

TRANSPORT COMPANY
EMPLOYEE

Whether at work or privately - the mobile is a permanent companion for me no matter what. Of course I am therefore permanently exposed to the radiation from Wi-Fi and Bluetooth and other sources, and this made me start thinking. I then went on the internet and came across Geonado and discovered this Harmonisation hologram. Since then I have noticed that this radiation exposure and stress is more compatible with me I feel that I can handle this better.

Markus Prock

SPORTS DIRECTOR ÖRV
AND MANAGER

Already as a professional athlete I always knew that our health was the highest priority. Unfortunately, as a manager and sports director I have to make a lot of phone calls. This is something I just can not avoid. Since I have put this hologram on my cell phone I can feel that I don't feel so drained, especially after long calls. That alone is a huge added value for me and that's why I would no longer want to do without it!

Sophia Ritzer

ADMINISTRATIVE ASSISTANT

Me and my friends go online and talk to each other on the phone for ours every day. Of course I know this is not good for my health but I do not want to restrict the use of my smartphone. My mother gave me this holgram because she was worried about my health. Since I use it I have noticed that my cell phone gets less hot during long phone calls. So I think this hologram has some positive effects and I am glad to have it on my phone.

Barbara Ackermann-Kreitmair

NATUROPATHY
PRACTITIONER

Since the hologram is on my cell phone I can literally feel that the warming and the irritation (feeling of pressure, poor concentration, dizziness) has gone, also on longer phone calls. As a therapist who takes interest in technology I am worried about the increasing electrosmog inside cars. I think even here the Hologram can do a good job.

About Geonado

Geonado experts have decades of experience in research, measurement and analysis of geophysical and energetic fault zones. Together with the inventor of the „original wave“ (Adolf Wiebecke) on which all scientific evidence is based, Geonado sets itself the goal of improving the quality of life of humans and animals increasing, and protecting them from disturbing influences. To do this, Geonado cooperates with experienced experts and renowned scientists and doctors from all over the world.
